

**Elementary School Science is fun when you participate in a hands-on learning adventure with **WFSU TV**.**

We integrate the View, Read, Do Model with a reality TV show geared towards elementary aged children—*Fetch! With Ruff Ruffman*.

Ruff Ruffman brings science to life for 6 reality TV contestants and WFSU can extend that learning to you through hands-on learning and books.

<p>Want to learn about beekeeping? What are the 3 types of bees in a hive? Learn all about bees from Fetch!, read books about bees, talk to an entomologist, look at real insects, and do an insect relay.</p>	<p>Join Ruff Ruffman and the Fetchers as they learn about gravity and the art of kite design. Make your very own kite that actually flies indoors. Read books about kites.</p>
<p>Does the solar system fascinate you? Watch the Fetchers as they set out on a city-sized space race then create your own constellation and read stories about space.</p>	<p>Do you ever wonder about the weather. Learn about hurricanes through hands-on experiments, read books about weather and people, and watch as the Fetchers learn to forecast weather.</p>

WFSU TV partnered with the LeRoy Collins Leon County Library System to bring these 4 Fetch! programs to children ages 5-10 years old during the summer of 2006. We can train you how to utilize the Fetch! Science Curricula in your classroom or other educational setting. Just **ASK US HOW**.

Other possible science themes include : states and properties of matter and life sciences. **All lessons follow National Science Education Standards.**

“The kids really enjoyed this program and looked forward to coming.” quote from a parent, summer 2006
